

Spiez, 02.08.2016

Approval

Approval ID: BZS D 16-601
Tested component: Injektion System
Hilti HIT-RE 500 V3
Approved supplier: Hilti Aktiengesellschaft
FL-9494 Schaan
Valid until: 31.08.2026

According to the results of the technical assessment of the documentation, the aforementioned component meets the required protection level set by the Federal Office for Civil Protection. It is thus approved for use in Swiss Protection & Support shelters and facilities.

The present Approval is only valid when signed by both the approved supplier and the Certification Office FOCP.

Daniel Jordi
Head of NBC Protection

Spiez, 02.08.16

Approved supplier

Hilti Aktiengesellschaft
9494 Schaan

Schaan, 02.08.2016

The present approval is based on the Federal Office for Civil Protection technical directives "Quality Management of Tested Components for Use in Protection & Support Shelters and Facilities" 1750-026 of 15 May 2014.

Adherence to the technical documentation/assembly instructions is legally binding to ensure the shock resistance compliance of the installed component.

The approved supplier is responsible for the overall quality of the product. The FOCP will test the components chiefly to ascertain that they meet its specific construction requirements.

The present approval is based on the documentation (see below).

- Opinion BBS engineers report no. 1617.1 from 25/07/2016
- ETA-16/0143 from 18/04/2016

By signing the present certificate, the approved supplier recognises the legal obligations set out in the FOCP technical directives "Quality Management of Tested Components for Use in Protection & Support Shelters and Facilities" 1750-026 of 15 May 2014.

Please note:

- The approval relates exclusively to the requirements contained in the established normative documents on EMP protection and shock resistance set out in the FOCP technical directives "Quality Management of Tested Components for Use in Protection & Support Shelters and Facilities" 1750-026 of 15 May 2014.
- The approved supplier bears sole responsibility (product liability) for compliance with other technical specifications, with generally binding and product-related regulations, as well as with technical, safety and environmental standards.
- In the event of abuse or deceptive use of the present approval, it will be unconditionally withdrawn in accordance with the aforementioned directives.
